Abhyudaya Sinha

Data Analytics & Python Enthusiast | Exploring Analytics, Dashboards & Data-Driven Problem Solving | SQL • Power BI • Tableau • Python

Noida, Uttar Pradesh, India

Summary

I enjoy transforming data into clear, meaningful insights through analytics, visualization, and practical problem solving. Currently exploring the intersection of: Data Analytics Business Intelligence Python & Data Science Data Visualization & StorytellingMy focus is not just on learning tools, but on understanding how data can uncover patterns, support decision-making, and solve real-world problems through practical implementation. Currently working with: • Python • SQL • Power BI • Tableau • Excel Recently, I've been building projects around: interactive dashboards business-focused analytics data cleaning & transformation analytics workflows visualization using real-world datasets Projects I've worked on include: Netflix Content Analysis Financial & Business Analytics Dashboards Interactive Data Visualization Projects One aspect I enjoy most about analytics is the balance between: logic, business thinking, and visual communication — turning raw information into insights people can actually understand and use. Alongside technical learning, I'm also interested in: # building in public # documenting my learning journey # modern portfolio design # creating clean, insight-driven digital experiences Currently focused on improving consistently through: projects, practical learning, experimentation, and real-world problem solving — one step at a time If you're interested in conversations around Data Analytics, Python, Visualization, AI, or tech-driven creativity, feel free to connect #
